11/02/2022

Dear Sir/Madam

Subject: REACH

I writing to inform you that,

In January 2022 the number of substances of very high concern (SVHC) on the REACH Candidate List Substances increased to 223.

As a producer and importer of articles Gripplle Ltd has identified no current registration or notification obligation for articles produced as we comply with the candidate list of substances for authorisation (SVHC).

However, as a Downstream User Gripplle Ltd is communicating with its suppliers to ensure that the substances used in the materials they supply are registered. At this stage our suppliers have either provided chemical analysis or have confirmed in writing that their products do not contain substances on the SVHC list. On this basis we do not foresee any problems in the maintenance of supply to our customers.

So far, we have not been notified that any products we supply contain Substances of Very High Concern as outlined in the ECHA document entitled "Obligations Linked to the Candidate List of Substances of Very High Concern". Should this situation change with the additional updates to the SVHC list or REACH regulation changes then we will provide you with such information as required.

If you require any further information or have any information which you feel might be relevant to the uses of the product, we supply to you, please do not hesitate to contact me.

For and on behalf of Gripplle Limited

A handwritten signature in black ink, appearing to read 'J. Palmer'.

James Palmer
Health, Safety & Environmental co-ordinator
