

TIME SAVINGS
80 HOURS

LABOUR SAVINGS
4 000€

INSTALLATION TIME
110 HOURS

At a student residence in Bamberg, the Fast Trak rail system was used to install cable trays faster, easier & cheaper compared to the traditional method. 210 rails and 420 vertical beams were installed.

Project Summary

Building type	Student Residence
Completion date	February 2022
Building structure	Concrete
Product suspended	Cable tray assembly

Features Products

“By using Fast Trak, I was able to [save time and money](#). My installers were very happy with the ease of installation. The initial concerns about the cables being threaded through quickly became secondary as the installation was very [easy and quick](#).”
